

ATMIYA UNIVERSITY

Established Under Government of Gujarat Private University Act 11, 2018

Yogidham Gurukul, Kalawad Road,
Rajkot - 360005, (Gujarat) INDIA

सुहृदं सर्वभूतानाम्

Respected Sir/Madam,

Greetings from Atmiya University, Rajkot

It is a pleasure in announcing that IIT Bombay is organizing a One day Workshop on **Arduino** on **08/02/2020 (Saturday)** for Teachers through online Mode in nearby Remote Center so that maximum number of faculty members can take benefit of expertise of prominent faculty from institutions of national importance like IITs.

ATMIYA University, Rajkot (Atmiya Institute of Technology and Science) is actively participating in the organization of this workshop as a Remote Center of IIT Bombay (**RC id: 1442**).

This workshop is being organized by the Teaching Learning Center (ICT) at IIT Bombay, a scheme of 'Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching' (PMMMNTT), an initiative of the **Ministry of Human Resource Development, Government of India.**

For registration and programme details, please visit website: <http://www.it.iitb.ac.in/nmeict/workshopContent.html?workshopid=wAF5jyxA48ecERjoWkMBGA>

Attached is the Brochure of the same for your reference.

The last date for registration is 13 December 2019, 12.30 pm.

Please register early, as Organizers require two months for manufacturing and shipping the kit to Remote Centres. We may also not extend the registration date beyond 13 Dec. 2019

Kannan M. Moudgalya, Ph.D

IIT Bombay

04 December 2019

Dear Sir/Madam,

Greetings from IIT Bombay!

We are glad to announce a one day workshop on **Arduino**, a free/libre and open source hardware. Arduino consists of both a physical programmable circuit board and a software **IDE** (Integrated Development Environment) that runs on the computer.

This workshop will be conducted for Teachers under Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMMNMTT), funded by the Ministry of Human Resource Development, Government of India.

Details of this programme are given below:

Workshop Name: One Day workshop on Arduino for Teachers

Who should attend? The participant should be a teacher or a research scholar from Electronics or allied engineering fields and should have basic electronics knowledge, required to work with Arduino, breadboard and electronic components.

Date: Saturday, 08 February 2020

Venue: 142 participating remote centres. A list of which will be available through this link:

<http://www.it.iitb.ac.in/nmeict/coordinatorList.html?workshopid=wAF5jyxA48ecERjoWkMBGA&callFrom=1>

How the workshop will be conducted:

This one day workshop on Arduino will be the second workshop in the IoT series. There will be interactions through A-VIEW at the beginning. After that, all participants at respective remote centres will learn to program a microcontroller, using Arduino Uno. Components like Arduino Uno, breadboard, sensors and other electronic components required for this workshop will be sent to every participating Remote Centres. There will be a total of three interaction sessions using A-VIEW. There will be about 5 hours available for practising Arduino and 2 hours for interactions, a detailed schedule of which will be sent to you later.

The participants of the main workshop have to pay Rs. 1,100/- to IIT Bombay to cover the cost of the above mentioned Arduino kit at the time of registration. A kit comprising the following will be given to every participant, which they can take home after the workshop:

Arduino Uno compatible board, 10+ resistors, breadboard, tricolour LED, red LED, 7 segment displays (2), 16x2 LCD display, decoder IC, potentiometer, L293D H-Bridge IC, toy motor, push button switches (2), buzzer, DHT11 temperature humidity sensor, ESP8266 wifi module, and all required cables, jumper wires, and a plastic box.

Participants will also have to pay a maximum of Rs. 400 to the RC directly on the day of the workshop, from which, RC will provide lunch and coffee / tea / snacks.

Procedure to participate in the workshop:

To participate in this workshop, please login to the website (<https://www.it.iitb.ac.in/nmeict/>). The registration portal for the workshop will open from **04 December to 13 December 2019**. **Please register early**, as we require two months for manufacturing and shipping the kit to Remote Centres. We may also not extend the registration date beyond 13 Dec. 2019.

Please [click here](#) to register for the Arduino workshop.

I request you to kindly send this email to the faculty/teachers of your nearby colleges/schools and educational institutions.

We look forward to your enthusiastic participation in this initiative.

Regards,

Prof. Kannan Moudgalya
PI, Pandit Madan Mohan Malaviya National
Mission on Teachers and Teaching (PMMMNTT)

1. Introduction

IIT Bombay has conducted many large-scale teacher training workshops under the Train 10,000 Teachers (T10KT) programme, sponsored by the National Mission on Education through ICT (NMEICT), MHRD, Govt. of India, and trained over 2,00,000 teachers. About 550 Remote Centres (RC) have been established as a part of this programme.

Another award winning technology developed at IIT Bombay is Spoken Tutorial, using which more than 50 lakh students have been trained on various ICT topics. The effectiveness of this method can be seen from this TEDx talk and the testimonials available here:

<https://spoken-tutorial.org/testimonials/media/?foss=70>. The Spoken Tutorial project is also implemented successfully at IIT Bombay, with funding from NMEICT, MHRD.

The Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMMNTT), also an initiative of MHRD, combines T10KT and Spoken Tutorials to provide large scale blended training. Next on this series is a hands on Arduino workshop, to be conducted on Saturday, 08 February 2020, at IIT Bombay. Participants of this workshop will be able to work with this hardware by listening to appropriate Spoken Tutorials.

We will get the required hardware custom made and have them couriered to IIT Bombay for the Coordinators' Workshop and to all the RCs for the Main Workshop. This will help keep the costs low, without affecting the learning outcome. All participants can take home this hardware after the workshop.

As the Spoken Tutorial method offers hands on practice, with 100% active learning, those who undergo this training will be able to continue to work with the hardware even after the workshop. They will also be able to conduct Arduino workshops for their students, using Spoken Tutorials, on their own, without requiring any help from anyone else.

2. Methodology of the Workshop

It will be a one day workshop on Saturday, **08 February 2020**. All participants have to go to their chosen Remote Centre (RC). There will be a live video interaction through A-VIEW at the beginning. After that, all participants who join this course from a Remote Centre, will learn to do various experiments using the Arduino kit, at that RC. We will have two more interactions during the day. There will be about 5 hours available for Arduino training and 2 hours for interactions. Participants at each Remote Centre will be helped by a Course Coordinator who would have attended the Coordinators' workshop at IIT Bombay on **18 January 2020**.

3. Course content

Arduino is an open source platform used for building electronics projects. Arduino consists of both a physical programmable circuit board or microcontroller and a software, **IDE** (Integrated Development Environment) that runs on the computer. It is used to write and upload computer code to the physical board.

Learning Arduino from Spoken Tutorials

Following Arduino tutorials are available at https://spoken-tutorial.org/tutorial-search/?search_foss=Arduino&search_language=English

- Electronic components and connections
- Introduction to Arduino
- Arduino components and IDE
- First Arduino Program
- Arduino with Tricolor LED and Push button
- Arduino with LCD
- Display counter using Arduino
- Seven Segment Display
- Pulse Width Modulation
- Analog Digital Converter
- Wireless connectivity to Arduino

Participants are encouraged to go through these tutorials before they come to the workshop.

4. Teaching faculty

This workshop will be conducted using the Spoken Tutorial methodology. Participants will learn Arduino by listening to the Spoken Tutorials and practicing them on 'Arduino kit'.

Prof. Kannan Moudgalya, Principal Investigator, PMMMNTT, FOSSEE and Spoken Tutorial projects will coordinate this workshop.

Mr. Srikant Patnaik, Mr. Rajesh Kushalkar, Ms. Nancy Varkey and Ms. Nirmala Venkat, of FOSSEE/Spoken Tutorial projects at IIT Bombay, and **Prof. G.V.V. Sharma** of IIT Hyderabad will be the teaching faculty.

5. Course fee

The course fee for the workshop is Rs. 1,100/-, which has to be paid at the time of online registration. A kit comprising the following will be given to every participant, which they can take home after the workshop:

Arduino Uno compatible board, 10+ resistors, breadboard, tricolour LED, red LED, 7 segment displays (2), 16x2 LCD display, decoder IC, potentiometer, L293D H-Bridge IC, toy motor, push button switches (2), buzzer, DHT11 temperature humidity sensor, ESP8266 wifi module, and all required cables, jumper wires, and a plastic box.

Participants will also have to pay a maximum of Rs. 400 to the RC directly on the day of the workshop, from which, RC will provide lunch and coffee / tea / snacks.

Please note that the registration fee once paid is neither refundable nor adjustable under any circumstances.

Important payment instructions:

In case of a course fee transaction failure, the participant will get an auto generated mail with instructions for further process. Please go through the mail carefully. If the amount is already debited to your account, please do not make another payment.

In case of a double payment (or more than once), please send a mail to dbpaccounts@cse.iitb.ac.in requesting for a refund. The participant will also have to check the following link for his/her vendor creation in order to get a refund. IIT Bombay will not be able to process the refund if the vendor creation, as per IIT Bombay's requirement, is not completed by the participant.

Link:- <https://portal.iitb.ac.in/vrp/index.jsp>

6. Who should attend?

The participant should be a teacher or a research scholar from Electronics or allied engineering fields and should have basic electronics knowledge, required to work with Arduino, breadboard and electronic components.

7. Criteria for issuing Certificates

E-certificate will be provided to the participants after successful completion of the workshop.

8. Duration and Venue

The workshop will be conducted at [Remote Centres of IIT Bombay on Saturday, 8 February 2020, from 9.30 AM to 6.00 PM](#). This workshop will be conducted through a blended mode, using both live video conferencing facility (A-VIEW) and hands-on sessions using Spoken Tutorials. A detailed workshop schedule will be available soon.

9. How to apply?

Enrollment will be strictly online, and no other mode of application will be entertained. The last date of registration is Friday, **13 December 2019**. The URL for registration is:

<http://www.it.iitb.ac.in/nmeict/announcements.html>

Please register early, as we require two months for manufacturing and shipping the kit to Remote Centres. We may also not extend the registration date beyond 13 Dec. 2019.

10. Registration on the ST Forum

To make the course effective it is important that all participants register in the ST forum:

1. Click on the **Register** link in this URL - <https://spoken-tutorial.org/>
2. Fill up the registration form and submit.
3. You will get an email.
4. Activate your account by clicking the link in the email.
5. Note down your Username and Password.

11. Important points to note

- Neither IIT Bombay nor the Remote Centre will bear the travel expenses of the participating representatives. There shall also be no accommodation provided to the participants.
- All participants are required to bring earphones, as they will have to listen to video tutorials. Without earphones, the workshop will not at all be effective.
- Computers to practise Spoken Tutorials and to work with Arduino will be available at the Remote Centres. But if they wish, participants can bring their own laptops with Arduino IDE installed.

12. Address for communication

Dr. Kalpana Kannan
Project Coordinator, ESOS Project
Department of CSE, Kanwal Rekhi Building,
